

Part 1

Read Passage One and answer questions 1-7 on the Question-Answer Book.

Passage One:

Evolution of sanitation

- 1 **11** How did our ancestors go to the lavatory? What sort of toilets will people use in the future? These are some slightly embarrassing questions that we seldom ask. But dealing with our bodily waste is an important issue as old as civilisation itself. The history of the toilet is a private and personal part of the human race. *The Unspoken History of the Toilet*, a documentary that explores and explains the evolution of toilets, flushes out all the answers to these.
- 5 **12** When our ancestors gave up their nomadic lives as hunters or shepherds and the human population began to settle in one place, there had to be rules of conduct, as the earliest religious texts confirm. It was written in The Bible that humans "shall have a place outside the camp...and when you sit down outside, you shall dig with it and turn and cover your refuse".
- 10 **13** But how did you know how far away from the camp you should go? One Hindu text suggested firing an arrow, and defecating only where it landed. Another said not to defecate within 50 metres of a water source and at least five metres away from habitation.
- 15 **14** Later, the Romans started to build communal privies that had seats for 25 users. There the excrement would drop into the main drainage channel beneath the seats, and was thus swept away without anyone having to handle it. Running parallel, in front of the seats, was a smaller channel made of marble that provided water for washing. Romans would plunge a sponge stick into the water and then use it to wash the drainage channel. Providing the water to flush these toilets was a considerable feat.
- 20 **15** After the Roman Empire fell, sanitary innovation was abandoned by the Europeans for the next 1000 years as they did not have the building skills to keep the system working. It was not until 1594 that the first modern water closet was built by aristocrat Sir John Harington. It had an upper reservoir of water, and by lifting the attached rod the water could be released into the bowl. A second rod emptied the bowl into a cesspit beneath. Though not very sophisticated, the invention was in essence a flushing toilet prototype for future models.
- 25 **16** Over 170 years later in 1775, watchmaker Alexander Cummings filed the first ever patent for a toilet. His design included an s-bend to keep the smell at bay. It also had a sliding valve to empty the bowl. But this did not work very well as the sliding action could pull faeces back into the works, resulting in smell and clogging. This problem was solved by Joseph Bramah three years later. He improved the design by replacing the sliding mechanism with a self-cleaning hinged valve. The modified toilet remained in production for 150 years right up to the eve of the Second World War.

Future of toilets

- 30 **17** What kind of toilets might our children and grandchildren use? Japanese technology has taken flushing toilets to a new level by developing a heated seat and a spray to clean bottoms. Holland is also working on a machine that microwaves excrement and uses the gases produced to create electricity.

Read Passage Two and answer questions 8 -14 on the Question-Answer Book.

Passage Two:

From tragedy to glory

- 1 [1] There are always difficulties that we struggle to overcome. Cherie Yeung Siu-fong has not only overcome a difficulty as huge as losing both of her arms, she also inspires fellow Hongkongers and students with her optimism, courage and wisdom.
- 5 [2] Cherie Yeung Siu-fong lost both of her arms at the age of nine in an electrical accident, but she has never lost the courage to live on. "I was suddenly hit by a bare high tension power line when playing on the street, and went into a coma immediately," Yeung says.
- 10 [3] When she came round from surgery, she found her arms gone. "It felt hard to stand stably, because the lack of arms affected my sense of balance," she says, describing the feeling when she tried to stand up. She never cried over losing her arms, but immediately started to deal with the new situation and tackle the resulting obstacles. She soon mastered using tools such as chopsticks and pens with her feet. "It is an instinct, you don't have to learn those skills specifically, you just obtain the ability naturally," she says.
- 15 [4] A smile is always on Yeung's face, as she can always find the positive side of everything in her life. She remembers many of her neighbours looked oddly at her empty sleeves, but she did not mind. "They stare at you just out of curiosity rather than discrimination," she says. "On the flip side, I am afraid they will feel uncomfortable if I look at them in response. But if someone asks me [about my lost arms], I am glad to answer their questions and explain the situation." She believes communication dispels misunderstandings. "Don't hide yourself. I thought I could handle everything before, but actually no one can live solely on his or her own," she says, reminding young people to ask others for help when necessary.
- 20 [5] To cope with daily life, she came up with many ideas and asked her family or friends to put them in place. With the help of her mother, she attached her Octopus card to the strap of her rucksack. In this way she does not need to ask for the help of passersby every time she takes a bus or MTR. "It is for you to adapt to the environment, not for the environment to fit you," she says.
- 25 [6] It is very easy to be influenced by Yeung's enthusiasm. She has a wide range of hobbies, from painting to various sports, including swimming, cycling, marathon, triathlon, skateboarding and rock climbing. Her sporting talent and diligence have led her to represent Hong Kong in a lot of competitions, including the Asian Para Games.
- [7] After participating in the Hong Kong Marathon for three consecutive years, she hopes to engage more friends in sport. Last year she became a guide runner for her visually impaired friend, Siu Hoi-yan. With Yeung's help and dozens of days' practice, Siu finished the full distance of a 10km run.
- 30 [8] Yeung is now invited by many schools to talk with pupils, inspiring them with her achievements and spirit.

FORM 1

GENERAL ENGLISH

QUESTION-ANSWER BOOK

Name: _____

Class: _____

Class Number: _____

Set 4

Part 1 – Reading Comprehension (30 marks)

For each multiple-choice question, darken the appropriate circle. Otherwise, no mark will be awarded.

Passage One (15 marks)

1. What can you do if you want to learn more about the development of toilets?

2. According to paragraph 4, why was the Roman toilet advanced from a modern point of view?

3. According to paragraph 4, what is the use of the marble channel?

4. Why did the Europeans stop using the Roman sanitary system?

5. Find one word in paragraphs 3 to 5 which shares the same meaning with each of the phrases below. (4 marks)
 - i) getting rid of solid waste from the body _____
 - ii) a place where people live _____
 - iii) clever or advanced, and can do complicated tasks _____
 - iv) the first design of something from which other forms are copied or developed _____
6. Use the information from paragraphs 4 to 6 to decide whether the following statements are True, False or Not Given. (3 marks)

	T	F	NG
i) After the fall of the Roman Empire, Europeans continued to explore advanced sanitation.	☐	☐	☐
ii) Alexander Cummings built the first modern water closet.	☐	☐	☐
iii) Joseph Bramah's design was accepted by the upper class.	☐	☐	☐

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

7. Match the headings to the text. Write the letters (A-E) next to the matching paragraph numbers. One heading is not used. (4 marks)

Heading
A. The early modern toilet
B. Dark ages for cleanliness
C. Ancient rules
D. The Roman pioneer
E. Improved designs

Paragraph(s)	
2-3	
4	
5	
6	

Passage Two (15 marks)

8. According to paragraph 2, how did Yeung lose both of her arms?

9. What was Yeung's first challenge after her surgery?

10. In Yeung's opinion, why did people look oddly at her empty sleeves? Quote an expression from paragraph 4.

11. Find a word or expression in paragraphs 2-4 which has the same meaning as each of the expressions below. (4 marks)

- i) a deep unconscious state

- ii) became conscious again after an accident or operation

- iii) a different and contrasting aspect of an idea

- iv) makes a belief go away

12. When Yeung encounters challenges in her daily life, does she think others should change what they are doing to help her? Quote a phrase from paragraph 5 to support your answer. (2 marks)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

13. Use the information from paragraphs 5-8 to decide whether the following statements are True, False or Not Given. (4 marks)

	T	F	NG
i) Yeung often gets hurt when doing sports.	☐	☐	☐
ii) Yeung represented Hong Kong as a swimmer in the Asian Para Games.	☐	☐	☐
iii) Siu finished a full marathon.	☐	☐	☐
iv) Yeung contacts different schools and offers to speak to inspire students.	☐	☐	☐

14. Does Yeung give up easily when she encounters a problem? Find an example from the text to explain your answer. (2 marks)

F. Prefixes (8 marks)

Fill in the blanks with the most suitable words from the table below. You will need to add a prefix to each word to complete the meaning. No word is used more than once.

biography	lead	possible	national
ordinary	historic	qualified	legal

- David was _____ from the race because he made a false start.
- Have you read Barack Obama's _____? He writes about his life as the US president. It's very interesting.
- Can you please keep quiet? It is _____ to work when you're talking on the phone.
- In Hong Kong, it is _____ to drive under the age of 18.
- The Olympic Games is an _____ sports event that takes place every four years.
- These _____ objects were made early in human history, long before we had writing.
- The robber plans to _____ the police officers by reporting a false alibi.
- We have an _____ view of the Andes Mountains from our hotel room.

1.	2.	3.	4.
5.	6.	7.	8.

Answers written in the margins will not be marked.

G. Proofreading (10 marks)

Proofread the following text (numbered lines 1-10 only) without changing the meaning. No lines have more than one mistake and at least one line is correct. Do not make any changes to punctuation and do not make unnecessary changes. Use ONE word only for each correction. If you think there are no mistakes in a line, put a ✓ at the end of the line (example c).

Corrections must be done as follows:

Extra word: delete the extra word with a 'X' (example a).

Missing word: mark the position of the missing word with a '^' and write the missing word above it (example b).

Wrong word: underline the wrong word and write the correct word above it (example d).

a	When I was younger, my friends and I would X try to scare each other
b	by telling ghost stories. I never got frightened because I did not believe ^ ghosts.
c	In fact, I would laugh at anyone who said they did. However, I changed my ✓
d	mind about this last summer when I was staying <u>at</u> my aunt in Guangzhou.

My New Year's resolutions

- 1 My first New Year's resolution is to be healthier. I am unfit and often tired. To get more fitter, I will
- 2 play badminton for two hours every week. I will also eat less junk food and be more active during PE lesson.
- 3 My second New Year's resolution is to pass the grade seven flute exam with merit. I will pay more
- 4 attention and learn advanced techniques to improve my performances. I will also read books and attend
- 5 concerts. I will practise more and perform in front of strangers so that I won't be anxiety in the exam.
- 6 My third New Year's resolution is to get good results in Chinese History. I performed poor in the first
- 7 term exam. To improve my results, I will make notes and read books about the dynasties for learn more
- 8 about what is happening at that time.
- 9 Although there will probably be unexpected obstacles on the way to achieving my resolutions, I am sure
- 10 that I will be able to overcome them!
